Aerosol Photometer, Model PH-5

Photometer Model PH-5 The PH-5 digital photometer offers the smallest size and weight in a rack or cart mount version of any photometer available today!

Standard Features

High Resolution Graphical Display Menu-Driven Software Functions Automatic Zeroing and Ranging Proven LED Light Source (Light Chamber) Reference Settings for Multiple Testing Reagents Retains Reference Settings When Powered Off Displays Upstream Ref. / Concentration Setting Stable at Low Concentrations of Aerosol (≥ 10ug/l) Probe Selectable Audible, Visual, Vibrating Alarms Plug and Play Probe – 11 foot length USB Interface. Lightweight Heavy Duty Black Aluminum Case

Accepts Worldwide Operating Voltages Optional Heavy Duty Shipping / Carrying Case

Technical Specifications

Case: Black Aluminum w/ comb. lock Size: 13.5" L x 10" W x 6" H Weight: 18 lbs. (8.2 kg) Power: 100-250 VAC 50/60 Hz Power Consumption: .92Amps @ 120V .46Amps @ 240 V Minimum Display Reading: .0001% Maximum Display Reading: 1000% Sample Flow Rate: 1 CFM (28.3 SLPM)

Available Options

Probe Extension - 11 foot length Heavy Duty Shipping / Carrying Case

Graphical Display

Multi-function Probe

- The PH-5 is the most highly advanced aerosol photometer available today. The PH-5 utilizes a high resolution graphics display providing an easy to read panel display. The extremely simple menu-driven software system utilizes command prompts to inform the user of each setup process. The powerful microprocessor provides control of numerous functions, not available on any other aerosol photometer.
- The PH-5 plug and play probe is light weight and features remote control of alarm options (includes a visual, audible, and the *NEW INNOVATIVE VIBRATING* alarm). The machined aluminum housing and heavy duty metal connector to the main unit provides years of trouble-free use.
- Other upcoming features include electronic storage of the calibration report.
